Deadline for manuscript submissions:

15 May 2021

Message from the Guest Editor

This volume calls for papers that are able to highlight the route various disciplines within geoheritage research have taken in the past two decades, leading to the currently flourishing and fast-developing science that has fed such subdisciplines as geoconservation, geoeeducation and geotourism, among many others. We would like to make this Special Issue a landmark work, that provides a holistic overview of the evolution of the geoheritage science and how it has helped to foster such practical research fields as geotourism, also addressing how all these achievements can serve to embed the geosciences more deeply in the network of sciences and the actions of society at a time when global and planetary change is clearly visible within the human life span. We are particularly interested in holistic review-style works that not only provide a critical overview of the evolution of the science field in question, but also offer solutions towards the future. High-quality review papers can be published in this issue without publication fees.

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: Indexed in the [Emerging Sources Citation Index \(ESCI - Web of Science\)](#), [Scopus](#) and [other databases](#).

CiteScore 2019 (Scopus): **2.1**, which equals rank 79/187 (Q2) in the category 'General Earth and Planetary Sciences'.
